

**PROFILE** Italgen is a producer and distributor of electricity from renewable energy sources, it manages 28 hydropower plants and 4 photovoltaic plants, over 300 km transmission lines in northern Italy and has a significant stake in two wind farms in Bulgaria (18 MW)

A pipeline of further 80 MW of solar and wind projects are currently under development

Italgen is strongly committed to sustainability, it operates in full compliance with the environment and has obtained the most relevant certifications: ISO 9001, 14001 and EMAS (Eco Management Audit Scheme)

- KPIs**
- Installed capacity: 75 MW (100% renewable)
  - Energy production potential: 325 GWh/year
  - Equivalent households potentially supplied by Italgen: 120,000
  - Avoided CO2 emissions: 100,000 Tons/year

**GEOGRAPHICAL PRESENCE**

Hydro plants locations

2022 and 2023 results mainly influenced by low level of production due to extraordinary low rainfall in the period 1H23 impacted also by temporary regulatory measures

(€ m)	2018	2019	2020	2021	2022	2023
