

Italgen (100%)

Entry: June 2016

PROFILE

Italgen is a producer and distributor of electricity from renewable energy sources, it manages 32 hydropower plants and 9 photovoltaic plants for 103 MW of production capacity and over 300 km transmission lines in northern Italy

A pipeline of solar and wind projects is currently under development

Italgen is strongly committed to sustainability, it operates in full compliance with the environment and has obtained the most relevant certifications: ISO 9001, 14001 and EMAS (Eco Management Audit Scheme)

Hydro

Solar

- Installed capacity: 103 MW (100% renewable)
- Energy production potential: 372 GWh/year
- Equivalent households potentially supplied by Italgen: 143,000
- Avoided CO2 emissions: 161,000 Tons/year

KPIs

GEOGRAPHICAL PRESENCE

Plants locations

2022 and 2023 results mainly influenced by low level of production due to extraordinary low rainfall in the period 1H23 impacted also by temporary regulatory measures
